

IILM UNIVERSITY

GREATER NOIDA, UTTAR PRADESH

DATA ANALYSIS AND REPORTING USING MICROSOFT EXCEL

ACADEMIC INTERNSHIP PRESENTATION

ORGANIZATION

XcripTech

ROLE

Data Analyst Intern

STUDENT DETAILS

STUDENT NAME

ROHAN GARG

ENROLLMENT NO.

25SCS1003004398

PROGRAM

B.Tech – Computer Science &
Engineering

SECTION & BATCH

2CSE27 | 2025–29

Internship Overview

OVERVIEW & SCOPE

Organization

XcripTech

Designated Role

Data Analyst Intern

Primary Tool

Microsoft Excel

Focus

Data analysis & reporting

KEY WORK AREAS & RESPONSIBILITIES

- Data entry and organization of sales records.
- Data cleaning, duplicate checking and validation.
- Excel formulas and VLOOKUP-based processing.
- Pivot Tables for summarized analysis.
- Sorting, filtering and conditional formatting.
- Charts, reporting and dashboard-related work.

Project Objectives & Problem Statement

SCOPE & GOALS

PROBLEM STATEMENT

Raw sales data may contain many records that are difficult to analyze directly. Without systematic organization, cleaning and preparation, comparing sales performance and identifying useful patterns becomes time-consuming.

KEY OBJECTIVES

- Organize sales records into a structured dataset.
- Clean and validate records; check duplicates and missing values.
- Apply Excel formulas and VLOOKUP.
- Create Pivot Tables for summarized analysis.
- Use sorting, filtering and conditional formatting.
- Prepare charts, reports and dashboard-related outputs.
- Develop analytical thinking and attention to detail.

Dataset & Data Preparation

DATA WORKFLOW

TRACKED DATASET FIELDS

- Transaction Date
- Product ID and Product Name
- Category
- Sale Type
- Payment Mode
- Buying Price / Selling Price

PREPARATION CHECKLIST

- Review dataset structure and field relevance.
- Check inconsistent entries and formatting.
- Check duplicate records and missing values.
- Use sorting and filtering for easier inspection.
- Prepare the data for calculations and Pivot Tables.

VLOOKUP, Formulas & Data Processing

- VLOOKUP was used to retrieve related information from a structured reference table.
- Product ID served as the lookup key for connecting related information.
- Excel formulas were used for calculations and data processing.
- Calculated fields included Total Buying Value and Total Selling Value.
- Conditional formatting was used to highlight relevant values and patterns.

VLOOKUP(Lookup_Value, Table_Array, Col_Index, FALSE)

PROCESSING LOGIC

Product ID	Category	Buying	Selling	Looku p
P002	Cat 1	95	120	✓
P003	Cat 2	105	135	✓
P004	Cat 3	115	150	✓
P005	Cat 4	125	165	✓
P006	Cat 5	135	180	✓

Reference data → lookup → calculated fields

SUMMARY DIMENSIONS

Pivot Tables support multi-dimensional summaries of sales information.

Financial Totals

Sales, buying, selling and profit-related summaries.

Timeline Metrics

Monthly and time-based comparisons.

Payment Modes

Cash, UPI and card-related analysis.

Categories

Product-wise and category-wise summaries.

ILLUSTRATIVE CATEGORY SUMMARY

Example values are illustrative only; the supplied report contains no numeric totals.

Illustrative relative score (not actual sales)

ILLUSTRATIVE MONTHLY TREND

Sample values added only to demonstrate how an Excel chart can look.

VISUALIZATION AREAS

- Line charts for time-based patterns.
- Bar/column charts for product and category comparisons.
- Pie or doughnut charts for simple composition views.
- Conditional formatting for quick visual checks.
- Charts make summarized information easier to communicate.

Sales Reporting & Key Insights

ILLUSTRATIVE SALES-TYPE MIX

Example composition only — not measured internship results.

Illustrative percentage split

SUPPORTED INSIGHTS

- Structured data is easier to examine and report.
- Validation helps reduce data-quality issues.
- Pivot Tables support faster category and time summaries.
- Charts improve readability and communication.

Learning Outcomes & Internship Completion

CONCLUSION

KEY TECHNICAL LEARNING OUTCOMES

- Practical Excel-based data organization and analysis.
- Data cleaning, duplicate checking and missing-value validation.
- Application of VLOOKUP and spreadsheet formulas.
- Pivot Table creation for summarized analysis.
- Charts and data visualization for reporting.
- Improved analytical thinking and attention to detail.

INTERNSHIP COMPLETION CERTIFICATE

Office : 401, 4th Floor, Plot no-4, Veer
Savarkar block, Shakarpur New Delhi-110092

Date: 10-07-2026

To whomsoever it may concern

This is to certify that **Rohan Garg** has successfully completed his internship with **XcripTech** as a **Data Analyst Intern** from **May 28, 2026** to **July 9, 2026**.

During this period, he worked extensively on Microsoft Excel for data management and analysis. His responsibilities included data entry, data cleaning, report generation, and maintaining structured datasets. He also worked on creating dashboards, using formulas (such as VLOOKUP, Pivot Tables), and preparing reports for business insights.

He demonstrated strong analytical skills, attention to detail, and the ability to handle large datasets efficiently. His performance during the internship was found to be very good, and he completed all assigned tasks with dedication and professionalism.

We wish him all the best for his future career.

Thanks & Regards

Sincerely,

Xcrip Tech

Authorised Signatory

Anand Kumar
(Director)

Conclusion: The internship strengthened practical skills in data preparation, Excel processing, Pivot Tables, visualization and structured reporting.

THANK YOU
